Target Customers

ImageGrafix customers are within the fabrication, manufacturing and power and process plant industries.

Product Description

As a VAR for Autodesk for the mechanical vertical products, ImageGrafix provides first class integrated CAD/CAM/CAE software solutions for the engineering and manufacturing companies. ImageGrafix solutions include design, manufacture and control production of Sheet Metal components and products. Industries include woodworking; routed parts to complex 5-axis furniture components. ImageGrafix provides software licenses, installation, customization, integration, implementation along with full support and training.

Benefits

ImageGrafix mechanical solutions and services covers almost all areas within the projects requirements. Our customers do not need various suppliers in order to deal with. From the initial consultancy and selecting the most suitable software licenses to on-site support & training and integration/implementation services, ImageGrafix makes sure that the clients receive the latest CAD/CAM/CAE solutions available based on Autodesk technology.

Relation to Autodesk Products

All CAD/CAM/CAE solutions which ImageGrafix provides, are based on the latest platform of the Autodesk mechanical software products.
