

For Immediate Release**COADE PV Elite 2010 webinar scheduled for January 19**

HOUSTON, TEXAS – January 5, 2010 – COADE announced today that a webinar on PV Elite 2010 is scheduled for January 19, 2010, 12 noon CST, when participants will learn about enhancements to PV Elite 2010, the company's popular software for pressure vessel and heat exchanger design and analysis. Webinar leader will be Scott Mayeux, director of development for Pressure Vessel and Exchanger Solutions at COADE. A Mechanical Engineer with 20 years in the engineering and software development field, Mayeux has expertise in vessel and exchanger analysis codes such as WRC, TEMA, API and others.

Webinar discussions will include PV Elite 2010 code updates for ASME Section VIII Div. 1 and Div. 2, WRC and EN-13445 plus new seismic codes for Venezuela (PDVSA) and Chile (NCh2369), updates to the Australian wind and seismic codes and more. New productivity features to be covered include capabilities for modeling and analyzing ear and perpendicular lifting lugs, enhancements for minimum design metal temperature (MDMT) analysis and reporting, and improved compatibility with Microsoft Window 7.

About COADE

COADE, Inc. is a provider of software for multiple plant design and engineering disciplines. COADE's aims are that design and engineering should share relevant information seamlessly, thereby maintaining accuracy and improving efficiency. COADE's product line conforms to those goals and includes: CAESAR II, the world's most widely used pipe stress analysis software; PV Elite for pressure vessel and heat exchanger design and analysis; CADWorx Plant Design Suite for intelligent plant design modeling, process schematics and automatic production of plant design deliverables; and TANK for the design and analysis of oil storage tanks. COADE, CAESAR II, CADWorx, PV Elite, CodeCalc and TANK are registered trademarks or trademarks of COADE, Inc. For more information, visit www.coade.com.
