

In this issue:

- 1) PVElite 2009 and CodeCalc 2009 - New June Build Update
- 2) New CADWorx Design Create and CADWorx Design Viewer for publishing and viewing date-limited, password protected review models
- 3) Current Versions of COADE Software
- 4) COADE CADWorx P&ID featured in Chemical & Engineering Progress - May 2009 issue
- 5) The AutoCAD® Inventor® Suite product line
- 6) Autodesk Inventor 2010 Technical What's New Brochure
- 7) AutoCAD® Mechanical design and drafting software is AutoCAD® software for manufacturing
- 8) AutoCAD® Electrical software is AutoCAD® for controls designers

In this issue (Q3-2009) :

CADWorx software giveaway - ends Dec. 31!

At COADE we know that things are tight, and the name of the game is getting the best out of every dollar you invest in your business. Because of this you may be considering passing up on critical software purchases or keeping your software up-to-date.

We understand, but we also feel that having the right tools, coupled with ongoing quality support, is key to your success. So, we wanted to do something that would not only encourage you to reconsider that purchase or renew your maintenance, but also, give you additional opportunities to increase efficiency and boost productivity.

That is why COADE is introducing a limited time offer:

Purchase new seats or renew your software maintenance on selected COADE products before December 31st, 2009 and receive free software!

Renew your software maintenance or purchase CADWorx Plant Pro:

- Receive a copy of COADE CADWorx P&ID (a \$1600 value)

Renew your maintenance or purchase CADWorx P&ID Pro:

- Receive a copy of COADE CADWorx Datasheets (a \$1500 value)

Contact us to discuss how using the latest versions of your plant design tools can help boost your productivity and how CADWorx P&ID and Datasheets can help you become more efficient.

PVElite 2009 and CodeCalc 2009 - New June Build Update

Main enhancements of the new build update includes, expanded ASME material databases, improved capability for low temperature ASME materials, updated 3D graphics, better output clarifications, updated help system and additional PDVSA Seismic code. Products that interface with PVElite and CodeCalc are CADWorx Equipment, PV Fabricator, CodeCalc & Nozzle Pro. For further details on this new build update, please Click Here

New CADWorx Design Create and CADWorx Design Viewer for publishing and viewing date-limited, password protected review models

CADWorx Design Create has been released. This is an add-on for CADWorx Design Review for publishing date-limited and password protected review models that can be read by CADWorx Design Review and CADWorx Design Viewer. CADWorx Design Viewer is a free viewer that allows project stakeholders to view models published by CADWorx Design Create, including the ability to view animations plus access to all intelligent information including model markups and annotations. CADWorx Design Review provides 3D review of plant design models for collaboration among designers, project managers, facility owners and other stakeholders involved in the review, modification and approval of designs prior to fabrication or construction. CADWorx Design Create, CADWorx Design Viewer, and CADWorx Design Review provide full integration with CADWorx Plant.

Current Versions of COADE Software

Product	Version	Build Number	Build Date
CADWorx	2009	20090114	January 14, 2009
CAESAR II	5.20	090430	April 30, 2009
CodeCalc	2009	090101	Jan 1, 2009
PV Elite	2009	090101	Jan 1, 2009
TANK	3.10	090527	May 27, 2008

COADE CADWorx P&ID featured in Chemical & Engineering Progress May 2009 issue

COADE announced today that the May 2009 issue of Chemical & Engineering Progress magazine featured an article on CADWorx P&ID, a primer on flow diagrams that describes the distinctions between a basic block flow diagram and the process flow diagram (PFD) which is the precursor of the P&ID, an acronym for process and instrumentation diagram and piping and instrumentation diagram, a useful tool that, with the modern technology provided by CADWorx P&ID, has become even more valuable and vital to the plant designer and engineer. The article describes how, with CADWorx P&ID, these are longer passive drawings that hold information that only skilled CAD operators can access but intelligent tools that play a valuable and vital role in the design process. This value is in part because P&IDs are the best way to accurately document the operation of the process and also because they are a health and safety document required under government regulations. Click Here for a copy of this article.

The AutoCAD® Inventor® Product line

The AutoCAD® Inventor® Product line combines Autodesk® Inventor® 3D mechanical design software and AutoCAD® Mechanical software to help you cost-effectively take advantage of a Digital Prototyping workflow. With different product configurations that offer specific levels of functionality to fit your design needs, no company is more focused than Autodesk on helping you create accurate digital prototypes and bring better products to market faster at less cost.

AutoCAD® Mechanical design and drafting software is AutoCAD® software for manufacturing

AutoCAD® Mechanical design and drafting software is AutoCAD® software for manufacturing, purpose-built to accelerate the mechanical design process. It includes all the functionality of AutoCAD, the world's leading CAD software, plus comprehensive libraries of standards-based parts and tools for automating common design tasks. AutoCAD Mechanical offers significant productivity gains and saves hours of design time. Learn how you can boost your productivity by up to 65 percent. This study compares how much time it takes to complete 10 common tasks in basic AutoCAD versus AutoCAD Mechanical.

AutoCAD® Electrical software is AutoCAD® for controls designers

AutoCAD® Electrical software is AutoCAD® for controls designers. Purpose-built to create and modify electrical control systems, it includes all the functionality of AutoCAD plus a complete set of electrical CAD features. Comprehensive symbol libraries and tools for automating electrical engineering tasks help save hours of effort, so you can spend more time innovating. A move to AutoCAD Electrical could help you increase your productivity by 80 percent. This study compares the time it takes to complete 10 tasks in AutoCAD versus AutoCAD Electrical.
