

PIPENET VISION Process & Power Industry Powerpoint Presentation

You now have the chance to download and view the latest PIPENET VISION Powerpoint Presentation. PIPENET VISION Software Modules are being widely used by international EPC and Plant Owner/Operator companies for rapid flow analysis in PIPE and DUCT networks. Three PIPENET Software Modules ensure that, no matter how extensive or complex your network, PIPENET VISION will perform.

To view an download the latest "PIPENET VISION Process & Power Industry Powerpoint Presentation", you need to use the following URL: <http://www.box.net/shared/fvubp1813i>. You will then be asked for a password. Please use the following password: **PNPPT18JUNE2009P**

This presentation which is aimed at raising the profile of using **PIPENET VISION Transient Module** in the minds of Managers, Operators, Plant Owners, Designers and Installers covers the following subjects and more:

- * Why using Transient Module?
- * Why don't engineers undertake surge analysis?
- * Type of damages that arise from Surge events [catastrophic failure to pipeline and equipment and fatigue damage to pipelines, equipment and support].
- * Damages due to Water/Steam Hammer in power industry.
- * Photos from customers showing the damages on Pipeline Systems.
- * Project examples such as complex Firewater Systems within Refineries, Offshore Platforms, Airport Hangar Firewater Systems, Deluge Systems and Plant Cooling Water Systems have been demonstrated using PIPENET VISION Spray/Sprinkler and PIPENET VISION Standard Software Modules.
